## *The Sparkling New Granite Polishing System*

Granite floor restoration has reached new heights with the development of Stardust & Jimmy Granite Polishing System.

Floors which have become dull and lifeless through constant wear can now be revitalised to a sparkling finish with Stardust & Jimmy.

With the added advantage of being a unique waterless system, just sprinkle Stardust on the floor, add a little Jimmy and work into the floor with a rotary machine and within minutes lifeless granite floors are transformed into vibrant colourful surfaces.

Stardust & Jimmy allow the contractor to work in areas where water is prohibited and to achieve a wonderful, highly professional finish.

### Directions For Use

Sprinkle 15 grms of Stardust Powder per m<sup>2</sup> of floor. To this add 30grms of Jimmy emulsifying agent. Using a rotary floor machine 200/400 rpm with a non-rust steel wool floor pad, work over the granite until all the paste disappears – between 2-4 minutes per m<sup>2</sup>.

Change the non-rust steel wool floor pad for a clean one.

Add 30grms of Jimmy agent to the floor and again work this in until all the residue disappears. Then buff with a white/red floor pad to add an extra sparkle.

**Daily Maintenance:** Stone Glo

**Periodic Maintenance:** Use Stardust & Jimmy as above.
